What is Chemistry? - Tutoring Videos for Chem | Clutch Prep

Chemistry is the natural science involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it provides ...

Acid-base property of the resulting solution from a neutralization reaction depends on the remaining salt products. A salt containing reactive cations undergo hydrolysis by which they react with water molecules, causing deprotonation of the conjugate acids. For example, the acid salt ammonium chloride is the main species formed upon the half neutralization of ammonia in hydrochloric acid solution:

In a recent review published in Nature Reviews Chemistry, Cronin group researchers describe how machine learning, coupled with real-time chemistry, is set to change the way chemists discover molecules, reactions and reactivity, as well as removing researcher bias. The systems discussed would remove the need to have an biased human chemist making judgements, in favour of searching chemical space ...
