It looks like you've created a C++Builder project, but written/pasted in Delphi code. Delphi doesn't use ILINK at all, and it doesn't use STDCTRLS.OBJ (it would complain about StdCtrls.dcu instead).. Since you have no functional code in the project, I'd just start over.

### **delphi - Unable to open file 'STDCTRLS.OBJ' - Stack Overflow**

You probably don't want to do this: #include "client.cpp" A \*.cpp file will have been compiled by the compiler as part of your build. By including it in other files, it will be compiled again (and again!) in every file in which you include it.

4 8 16 In the first call to the function, we only define the argument a, which is a mandatory, positional argument. In the second call, we define a and n, in the order they are defined in the function. Finally, in the third call, we define a as a positional argument, and n as a keyword argument.. If all of the arguments are optional, we can even call the function with no arguments.

I'd recommend using a macro to process the files within a folder to convert them from xls to xlsx. This code assumes that the files are all located within one folder and that all xls files need to be converted, but if you wanted to select individual files this code could be updated.
