The Role of H^+ and OH^- ions In the Chemistry of Aqueous Solutions . Because oxygen (EN = 3.44) is much more electronegative than hydrogen (EN = 2.20), the electrons in the H O bonds in water aren't shared equally by the hydrogen and oxygen atoms. These electrons are drawn toward the oxygen atom in the center of the molecule and away from the hydrogen atoms on either end.

Definitions of Acids and Bases, and the Role of Water

Indicators are used to determine whether a solution is acidic or alkaline. Acids react with metals, bases and carbonates to produce salts. Neutralisation is the reaction between an acid and a base.

ACIDS, BASES AND pH. There are millions of chemical substances in the world. Some of them have acidic properties, others, basic properties. Acids are substances which free hydrogen ions (H^+), when they are mixed with water. Bases are substances which free hydroxide ions (OH^-) when they are mixed with water. (This freeing of ions is called dissociation in both cases).

Experiments with Acids and Bases - Fun Sci

The key to understanding acids (as well as bases and salts) had to await Michael Faraday's mid-nineteenth century discovery that solutions of salts (now known as electrolytes) conduct electricity. This implies the existence of charged particles that can migrate under the influence of an electric field.

Watch a reaction proceed over time. How does total energy affect a reaction rate? Vary temperature, barrier height, and potential energies. Record concentrations and time in order to extract rate coefficients. Do temperature dependent studies to extract Arrhenius parameters. This simulation is best used with teacher guidance because it presents an analogy of chemical reactions.

Test the pH of things like coffee, spit, and soap to determine whether each is acidic, basic, or neutral. Visualize the relative number of hydroxide ions and hydronium ions in solution. Switch between logarithmic and linear scales. Investigate whether changing the volume or diluting with water affects the pH. Or you can design your own liquid!
