Are you saying the business logic is the helper objects, or in the stored procs? I'm asking as many people seem to think you are saying the later...but what I think you are saying is that you still have business logic in the coded objects, you are just getting data straight from the database and using that data, rather than an ORM or mapping to specialized objects to hold the data.

sql - Why do we need entity objects? - Stack Overflow

Critical reasoning questions test your ability to analyze logical arguments. The arguments cover a range of topics and situations which average GMAT-takers would be expected to be able to understand, even if they are not very familiar with the subject area.

GMAT Critical Reasoning : Practice Tests and Information
