A stochastic simulation is a simulation that traces the evolution of variables that can change stochastically with certain probabilities.. With a stochastic model we create a projection which is based on a set of random values. Outputs are recorded and the projection is repeated with a new set of random values of the variables. These steps are repeated until a sufficient amount of data is ...

Stochastic simulation - Wikipedia

Question 3.The compound shown on the right exhibits fluxional behavior in the proton-decoupled ^{31}P NMR. As the sample is cooled, the singlet resonance broadens and decoalesces between -80 and -100 o C (the T depends on the nature of group X).. Below the coalescence point a pattern that appears to be a quartet is observed.
