Question. TUT Corporation has just extended their business. R3 is the new router from which they can reach all Corporate subnets. In order to raise network stableness and lower the memory usage and broadband utilization to R3, TUT Corporation makes use of route summarization together with the EIGRP Stub Routing feature.

ROUTE 300-101 Training

NAT Basics Overview. NAT basics, also known as network address translation is an important part of

the CCENT and CCNA certification exams. When NAT is implemented it allows a router to translate the source IPv4 address in the packet header as it crosses the router, changing the source address in the packet from one address to another.

ip route works like ip route <these destination IPS> (via) <this ip> (Don't actually include the word "via"). So the final IP in the command is the next hop those packets should take. This could also be an interface on the router itself instead of an IP of a neighboring router which is commonly used when you have point to point connections.
