Second Semester / advanced 20 All about chemical equilibrium This thorough treatment sets out the underlying concepts without invoking thermodynamics or complicated calculations; considerable emphasis is placed on the distinction between Q and K. The section on equilibrium calculations contains problem examples illustrating techniques such as iterative and graphical solutions of polynomials ...

Chem1 Online Textbook Main Menu

Chemistry is the natural science involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it provides ...
