The cells of the body consume an average 250 ml of oxygen per minute and produce about 200 ml of carbon dioxide per minute. The ratio of the carbon dioxide produced over the oxygen consumed is called the respiratory quotient. Hence, the average respiratory quotient is 0.8.: The figure below illustrates the movements of oxygen and carbon dioxide into and out of the lungs and tissue under resting ...

Preface to the Home Education Series. The educational outlook is rather misty and depressing both at home and abroad. That science should be a staple of education, that the teaching of Latin, of modern languages, of mathematics, must be reformed, that nature and handicrafts should be pressed into service for the training of the eye and hand, that boys and girls must learn to write English and ...
