T A random variable has a chi-square distribution with N degrees of freedom if it has the same distribution as the sum of the squares of N independent variables, each. Categorical Data Analysis - Page 4. normally distributed, and each having expectation 0 and variance 1.

OVERVIEW - University of Notre Dame

Lesson Summary. Data that is collected can be either categorical or numerical data. Numbers often don't make sense unless you assign meaning to those numbers. Categorical data helps you do that. Categorical data is when numbers are collected in groups or categories. Categorical data is also data that is collected in an either/or or yes/no situation.
