Inventory control or stock control can be broadly defined as "the activity of checking a shop's stock." However, a more focused definition takes into account the more science-based, methodical practice of not only verifying a business' inventory but also focusing on the many related facets of inventory management (such as forecasting future demand) "within an organisation to meet the demand ...

Inventory control - Wikipedia

Note, by the way, that the `net.large_weight_initializer()` command is used to initialize the weights and biases in the same way as described in Chapter 1. We need to run this command because later in this chapter we'll change the default weight initialization in our networks.
