The Student's t-test is a statistical test that compares the mean and standard deviation of two samples to see if there is a significant difference between them. In an experiment, a t-test might be used to calculate whether or not differences seen between the control and each experimental group are a factor of the manipulated variable or simply the result of chance.

Evolutionary biology is the subfield of biology that studies the evolutionary processes that produced the diversity of life on Earth, starting from a single common ancestor. These processes include natural selection, common descent, and speciation. The discipline emerged through what Julian Huxley called the modern synthesis (of the 1930s) of understanding from several previously unrelated ...

Note: Paragraphs are numbered in small case in order to communicate with reviewers. 1. Introduction. One of the problems in understanding evolution is that it may be defined in different ways. According to the Random House Webster's College Dictionary (1999), biological evolution is a change in the genetic makeup of a population from generation to generation.

A couple of years after that news and more stories of black and other minority progress on GCSEs, GL Assessment, an independent testing organization, published results of their Cognitive Assessment Tests (CAT), indicating the performance of different ethnic groups. The CAT, though given to children at age 11, is highly correlated with GCSE results at age 16.
