VALENTINA BOSETTI - Universita' Bocconi

Nonparametric statistics is the branch of statistics that is not based solely on parametrized families of probability distributions (common examples of parameters are the mean and variance).

Nonparametric statistics is based on either being distribution-free or having a specified distribution but with the distribution's parameters unspecified.

CHAPTER 7. 7-78. Often the most difficult step in the marketing research process is: A) analyzing the situation. B) defining the problem. C) getting problem-specific data. D) interpreting the data. E) All of the above. 7-87. Data that has already been collected or published is: A) useful data. B) secondary data. C) primary data. D) free data.

Chapter 9—Product Concepts

Defensive operations defeat an enemy attack, buy time, economize forces, or develop conditions favorable for offensive operations. Defensive operations alone normally cannot achieve a decision. Their purpose is to create conditions for a counteroffensive that allows Army forces to regain the initiative (FM 3-0). Other reasons for conducting defensive operations include—
