Cassini revealed in great detail the true wonders of Saturn, a giant world ruled by raging storms and delicate harmonies of gravity. Cassini carried a passenger to the Saturn system, the European Huygens probe —the first human-made object to land on a world in the distant outer solar system.. After 20 years in space — 13 of those years exploring Saturn — Cassini exhausted its fuel supply.

Solar Time - Solar time is based on the 24-hour clock, with 12:00 as the time that the sun is exactly due south. The concept of solar time is used in predicting the direction of sunrays relative to a point on the earth. Solar time is location (longitude) dependent and is generally different from local clock time, which is defined by politically defined time zones and other approximations.

Chapter 1: What is a solar charge controller? A solar charge controller, or solar charge regulator, is an important instrument in almost all solar power systems that use batteries as a chemical energy storage solution.

One of a solar engineer's tasks is to determine the efficiency of a solar panel system. A first step in determining solar system efficiency is a review of solar panel system technology. A PV panel system consists of an array of PV panels whose output is applied to an inverter that converts the ...

Solar panels on spacecraft supply power for two main uses: power to run the sensors, active heating, cooling and telemetry. power for spacecraft propulsion – electric propulsion, sometimes called solar-electric propulsion.; For both uses, a key figure of merit of the solar panels is the specific power (watts generated divided by solar array mass), which indicates on a relative basis how much ...

It starts to get tricky when you move away from battery based solar systems, and the 12V increments are no longer necessary. Grid tie solar panels with 60 cells are often referred to as 20V nominal panels, like the SolarWorld SunModule 290W solar panel.. They have too high of a voltage to charge a 12V battery bank with a traditional charge controller, but too low of a voltage to charge a 24V ...
