Remember that static electricity is an imbalance of electric charge between two objects. This imbalance has a definite polarity: one object is positive while the other is negative. This means that electrons rush in one direction when the two objects discharge through the path created by the neon gas inside the lamp. This unidirectional rush of ...

An electric current is a flow of electric charge, carried by negatively charged electrons in atoms of metals. Electrons are free to move and flow in a direction opposite to the conventional current. Cells and batteries supply direct current (DC), which flows only in one direction. Generators produce alternating current (AC), in which the electrons change direction many times in a second.

A Van de Graaff generator can produce a larger static charge than rubbing a balloon on a sweater. First, a high voltage power supply puts electric charge on a moving insulating belt. The belt carries electric charges upwards where a metal contact . This accumulation of voltage can reach up thousands or even millions of volts.

(no charge), while protons have a positive electrical charge. Electrons, which reside outside the nucleus, have negative electrical charges. Answer 2 Each atom of carbon is guaranteed to contain 6

protons. Unless the atom is electrically charged, it will contain 6 electrons as well to balance the charge of the protons.

Chemistry:++Ion+Worksheet++++Answers 1. What are cations?' Cations are positively charged ions. 2. What are anions?' Anions are negatively charged ions.

**Answers Cations are positively charged ions. Anions are negatively charged ions. Most metals form cations. Most non-metals form anions. - Annville-Cleona School District / Homepage**

iii. When charging an object by induction, the object receives the opposite type of charge as the object used to charge it. The answer to question 12 includes a detailed explanation of the induction charging method. iv. Since induction charging gives objects opposite types of charge, Object A must have an opposite charge as the aluminum plate. v.
