This first level of checking your answer weeds out the solutions that are obviously wrong — this is your “common sense” check. For instance, if your answer to an algebra problem is  $x = 5$ , and you were solving for Jon’s weight in pounds, you probably want to redo the work because five pounds doesn’t make any sense unless Jon is a ...

Ask yourself if your answer makes sense before you move on to another checking method. Read the question again, focusing on the operation and numbers involved. If you're solving a five-digit subtraction problem and your answer is larger than both of the original numbers, your logic check should tell you the answer is incorrect.
