42.50^@"C" The answer to this problem depends on whether or not you should approximate the density of water to be equal to "1.0 g mL"^(−1). Since no information about density was provide, I assume that this is what you must do. However, it's important to note that water's density varies with temperature, and that the value "1.0 g mL"^(−1) is only an approximation.
