Create printable tests and worksheets from questions with Circles. Select questions to add to a test using the checkbox above each question. Remember to click the add selected questions to a test button before moving to another page.

Test Questions with Circles - Help Teaching

Answers and Explanations. The radius (r) of that circle is half of the dimension shown as the width of the track, or 15 yards. Now, taking the formula for the circumference of a circle, $2\pi r$ (with $r = 15$), and adding it to the length of the two straight portions of the track, we have: Length = $(2\pi \cdot 15) + (2 \cdot 150) = 394.25$.
