The Biology Project, an interactive online resource for learning biology developed at The University of Arizona. The Biology Project is fun, richly illustrated, and tested on 1000s of students. It has been designed for biology students at the college and high school level, but is useful for medical students, physicians, science writers, and all types of interested people.

The Biology Project

A genealogical DNA test is a DNA-based test which looks at specific locations of a person's genome, in order to find or verify ancestral genealogical relationships or (with lower reliability) to estimate the ethnic mixture of an individual. Since different testing companies use different ethnic reference groups and different matching algorithms, ethnicity estimates and more distant DNA matches ...

One of the most common misconceptions about gout, according to an article by the Arthritis Foundation, is that diet is the primary cause. Gout, or gouty arthritis, is a painful condition caused by a high level of uric acid in the blood that can lead to deposits of uric acid crystals in the joints and tissues. Most often gout affects the big toe joint, but it can also occur in the hands, feet ...

Epigenetics is the study of heritable phenotype changes that do not involve alterations in the DNA sequence. The Greek prefix epi-(ἐπι-"over, outside of, around") in epigenetics implies features that are "on top of" or "in addition to" the traditional genetic basis for inheritance. Epigenetics most often denotes changes that affect gene activity and expression, but can also be used to ...
