Source: See endnote 18 for this chapter.. Progress in the renewable heating and coolingii and transport sectors continues to be relatively slow, despite a number of initiatives to boost the role of renewables and the electrification of heating and transport.25 Renewable heating and cooling has received much less attention from policy makers than renewable power generation and has been ...

Global Overview - ren21.net

Primary active transport, also called direct active transport, directly uses metabolic energy to transport molecules across a membrane. Substances that are transported across the cell membrane by primary active transport include metal ions, such as Na ⁺, K ⁺, Mg ²⁺, and Ca ²⁺. These charged particles require ion pumps or ion channels to cross membranes and distribute through the body.
