The family Columbidae was introduced by the English zoologist William Elford Leach in a guide to the contents of the British Museum published in 1820. Columbidae is the only living family in the order Columbiformes. The sandgrouses (*Pteroclididae*) were formerly placed here, but were moved to a separate order *Pteroclidiformes* based on anatomical differences (e.g., they are unable to drink by ...

The Horror of “Alien” Reproduction. Ask anyone how the creatures in “Alien” and “Aliens” reproduce, and you’ll get the same recap every time: the queen lays an egg, and a face-hugger hatches, finds a host, and implants a chest-burster.

The Horror of “Alien” Reproduction

La renna (*Rangifer tarandus* (Linnaeus, 1758)), nota anche come caribù in Nordamerica, è un cervide delle regioni artiche e subartiche, con popolazioni sia stanziali che migratrici; è l'unica specie del genere *Rangifer* (C.H. Smith, 1827). Sebbene nel complesso sia piuttosto diffusa e numerosa, alcune delle sue sottospecie sono rare e una di esse si è già estinta.

The standard approach to looking at fossils in the geological column is to assume that lower is older. Since the geologic column represents millions of years of Earth's history, then obviously the fossils in each of the layers must be the same age as the layer in which they are found. What is especially interesting is that the fossils do appear to show a progression from the most "simple" of ...
