Circuits and Symbols Electricity flows through circuits: paths of conductors (usually wires). Any break in the circuit will cause the circuit to fail, just like a break in a pipe lets water leak out of a water system. A closed circuit has no breaks: the light lights up. An open circuit has a break in it: the light will not light up. Circuit ...

It is very easy to build, safe, and should be assembled by each student individually in class. Also, emphasize how simple circuits like this may be assembled at home as part of the “research” portion of the worksheet. To research answers for worksheet questions does not necessarily mean the information has to come from a book!
