The chemical formula, as you can tell, gives a more exact representation of the substance. Look at glucose and formaldehyde. Glucose's chemical formula is $\text{C}_6\text{H}_{12}\text{O}_6$.

Calculating Percent Composition and Determining Empirical ...

In Euclidean plane geometry, a quadrilateral is a polygon with four edges (or sides) and four vertices or corners. Sometimes, the term quadrangle is used, by analogy with triangle, and sometimes tetragon for consistency with pentagon (5-sided), hexagon (6-sided) and so on.. The word "quadrilateral" is derived from the Latin words quadri, a variant of four, and latus, meaning "side".

Quadrilateral - Wikipedia

This lesson will go over the basics of cellular respiration and its chemical equation, discussing how this equation can be balanced and what its reactants and products are.

What Is the Chemical Equation for Cellular Respiration ...

Photosynthesis - All living things need food and energy to survive. The food-making and energy process for plants to survive is called photosynthesis. Plants make food and produce oxygen through photosynthesis. The process is complex but with the sun, water, nutrients from the soil, oxygen, and chlorophyll, a plant makes its own food in order to survive.

Chlorophyll is a green ...
