Diabetes causes a gradual restriction of blood flow. > In people without diabetes, fast blood flow triggers the enzymes that produce "NO". "NO" relaxes the smooth muscles in the walls of the vessels and prevent cells from sticking to the walls. It also blocks the ability of immune cells to home in on and protect the diseased portions of blood vessels.

How does diabetes affect the blood flow in the ...

Answers by Heart Fact Sheets | American Heart Association

States of mind surely affect health, and extreme emotional stress may damage immunity and bring on illness. But research into the link between mind and immunity is in its early stages and has produced very little solid evidence so far—and not much advice about how to protect the immune system from the ill effects of emotional stress.

Answers About Immunity - Berkeley Wellness

The cecum is the cul-de-sac at the beginning of the large intestine that descends from the union of the ileum and the large intestine. It provides a space for the mixing of bacteria with partially digested food from the small intestine to form feces.
