A plane B is perpendicular to a plane A if plane B contains a line that is perpendicular to plane A. (Think of a book balanced upright on a level surface.) See Figure 3. Figure 3 Perpendicular planes. Theorem 12: If two planes are perpendicular to the same plane, then the two planes either intersect or are parallel.

Parallel and Perpendicular Planes - CliffsNotes Study Guides

The following are short descriptions of the circle shown below. Tangent - is a line that would pass through one point on the circle. Secant - is a line that would pass through two points on the circle. Chord - is a secant that would terminate on the circle itself. Diameter, d - is a chord that passes through the center of the circle. Radius, r - is one-half of the diameter.
