Realism, sometimes called naturalism, in the arts is generally the attempt to represent subject matter truthfully, without artificiality and avoiding artistic conventions, or implausible, exotic, and supernatural elements. Realism has been prevalent in the arts at many periods, and can be in large part a matter of technique and training, and the avoidance of stylization.

In mathematics, two sets are said to be disjoint sets if they have no element in common. Equivalently, two disjoint sets are sets whose intersection is the empty set. For example, {1, 2, 3} and {4, 5, 6} are disjoint sets, while {1, 2, 3} and {3, 4, 5} are not disjoint. A collection of more than two sets is called disjoint if any two distinct sets of the collection are disjoint.
