High triglycerides are among the less common causes of pancreatitis, and are only associated with the acute disease, not the chronic form. Most people get acute pancreatitis as a result of gallstones that block the pancreatic duct, so the digestive enzymes manufactured in the pancreas can't be excreted into the stomach and intestines.

### **High Triglycerides & Pancreatitis | Livestrong.com**

Pancreatitis is an inflammation of the pancreas, an important organ for digestion and control of circulating levels of glucose. Acute pancreatitis involves a sudden inflammation of the pancreas, while chronic pancreatitis is a long-standing, slowly progressing inflammation of the pancreas.. Pancreatitis represents a disruption of the normal complex coordination in the body whereby digestive ...
