What and why. Not all safety professionals agree on what constitutes a near miss. Among the definitions: A fact sheet from OSHA and the National Safety Council defines a near miss as an "unplanned event that did not result in injury, illness or damage - but had the potential to do so." The fact sheet stresses that although near misses cause no immediate harm, they can precede events in ...

Of main interests to us is the use of mining as a part of in-situ resource utilization, that is: making it easier to industrialize and colonize space by removing the need to pay the sky-high delta-V cost of lugging raw materials up Terra's gravity well.. But in the early stages, asteroid mining start-ups cannot be established to provide minerals to space industrialization because there won't ...

If your first-in scouts have given you the luxury of lots of human-habitable worlds to choose your colony sites from, naturally you will pick the ones closest to being paradise planets.. If you are really outta luck and all the planets range from miserable hell-holes to utterly uninhabitable you have roughly five options:

Couple the beam from a 100 gigawatt laser with a single-layer lightsail and remarkable things can happen. As envisioned by scientists working with Breakthrough Starshot, a highly reflective sail made incredibly thin — perhaps formed out of graphene and no thicker than a single molecule — could attain speeds of 20 percent of  $c$ . That's good enough to carry a gram-scale payload to the ...
