When the smash-hit mobile gaming application Pokémon GO swept the globe last summer, the disruptive potential of augmented reality (AR) was thrust into the spotlight. It became the fastest game ever to reach \$600 million in revenue, which it did in just a few months. While time has taken some of the fizz out of the app, its popularity endures: it still rakes in \$2 million every day, according ...

China is the planet's most populous country and second largest by land mass. Its civilization is one of the world's oldest, and it has maintained an advanced economy for two millennia.

## **China - The New York Times**

Obesity in China is a major health concern according to the WHO, with overall rates of obesity between 5% and 6% for the country, but greater than 20% in some cities where fast food is popular. This is a dramatic change from times when China experienced famine as a result from ineffective agriculture plans such as the Great Leap Forward.

International schools in China. Over the past year, China has experienced more international school growth than any other country in the world. The growing popularity of international schools in China reflects not only the country's economic rise but also the fact that Chinese have long been passionate about learning English, which is regarded as an important key to success.
