AKVIS Magnifier is an efficient tool for increasing image resolution. If you attempt to blow up a picture (increase its resolution) using the standard Resize command of a photo editor, you will notice that the resulting photo is blurred and pixelated. The reason is that the input photo didn't contain enough information for the new size.

AKVIS Magnifier Enlarges Photos to Super-High Resolution

On-screen Show (16:9) sets the slide dimensions to 10 in x 5.625 in. Widescreen sets it to 13.333 in x 7.5 in.. Both of these options are the same aspect ratio so they will look the same in Normal View, since PowerPoint automatically adjusts the zoom level.Widescreen (13.333 in x 7.5 in.) provides more slide surface area for the content, so that is the best choice for presentations.

Change the size of your slides - Office Support

Having an external monitor hooked up to a Mac can boost productivity significantly, and most users who get a secondary screen just hook it up and start using it – it works, so why mess around, right? But to get the best picture and color representation out of your external display, you'll want ...

As of August 29, 2014, Google has decided to intentionally break old browsers. They say it's not a bug, it's by design here, even though Google's support page says it accepts Safari 4 as a fully supported browser. If you want Google searches to go back to the modern style, you need to change your User-Agent string.
