How To Configure Dynamic DNS Server On A Cisco Router

This is Cisco's authorized, self-paced, foundation learning tool for the latest version of the Cisco Designing Network Service Architectures (ARCH 300-301) exam, now required for CCDP certification. It presents a structured and modular approach to designing networks that are scalable, resilient, offer outstanding performance and availability, and have well-defined failure domains

Designing for Cisco Network Service Architectures (ARCH ...

ip route works like ip route <these destination IPS> (via) <this ip> (Don't actually include the word "via"). So the final IP in the command is the next hop those packets should take. This could also be an interface on the router itself instead of an IP of a neighboring router which is commonly used when you have point to point connections.

Help me understand the 'ip route' command for cisco routers

Meraki Support Paradigm. All customers have an explicit support owner at all times. Normally this is a Cisco Meraki support team member; however, during pre-sales product it could be a Cisco Meraki Systems Engineer, VAR, or other field sales resource.

Cisco Meraki Support

Cisco virtual Port Channel (vPC) is a virtualization technology, launched in 2009, which allows links that are physically connected to two different Cisco Nexus Series devices to appear as a single port channel to a third endpoint.The endpoint can be a switch, server, router or any other device such as Firewall or Load Balancers that support the link aggregation technology (EtherChannel).
